

Product-Specific Design Requirements

- The design will be printed on the mediven® comfort print compression stocking, a below-knee (AD) stocking with 360° all-over digital printing.
- The following elements are fixed production requirements and cannot be changed:
 - * Black toe section
 - * Black heel section
 - * Black top cuff below the knee
- These black elements should be integrated harmoniously into the overall design concept.

Design Guidelines

- Design should ideally cover the entire printable stocking surface (360° concept).
- Consider the stocking as a cylindrical, three-dimensional object.
- The pattern should remain visually appealing from all viewing angles.
- Strong, expressive, fashion-forward designs are encouraged.
- Avoid large white areas.
- Avoid predominantly pastel color palettes.
- Designs should retain their visual impact even when the stocking is stretched during wear.

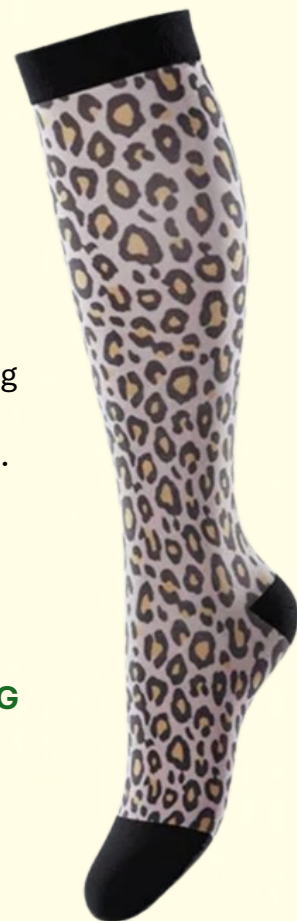

NO NEED TO SEND THE DESIGN ALREADY IN THE STOCKING SHAPE: JUST SEND THE DESIGN THEME YOU HAVE IN MIND, TOGETHER WITH THE MEANING OF IT AND YOUR BIO.
